New Product Announcement

Creative Sensor Technology's proven FSI series impeller flow sensors are now available with scaled pulse outputs.

COMPATIBLE WITH ALL HUNTER HYDRAWISE CONTROLLERS

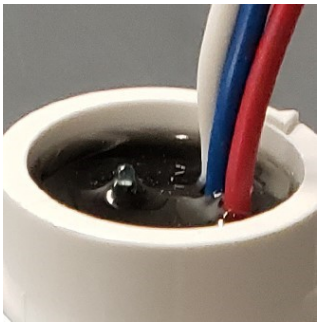

The SP3 version features a three wire circuit that produces pulses scaled to gallons. Installation guides list the size of the pulses.

Expand your range of flow measurement capabilities with CST technology

This signal is compatible with all Hunter Hydrawise irrigation controllers so installers can provide the remote monitoring and control capabilities of Hydrawise with the proven benefits of CST 3, 3 and 6 inch saddle type PVC sensors for larger commercial jobs, parks, athletic fields or other sites requiring higher flow rates.

- Unmatched flow measurement range up to 1100 GPM
- 150 psi working pressure
- Virtually no friction loss even at the highest flow rates
- No special fittings required
- Built for irrigation service with proven reliability

Instantly recognizable by LED and Red. White and Blue leads

Try an FSI-SP3
